

PRICES CONTINUE THEIR UPWARD CLIMB IN THE ST. JOHN'S HOUSING MARKET

Increased interest in higher-end and resale homes has led to continued price appreciation

ST. JOHN'S, October 15, 2014 – The Royal LePage House Price Survey released today showed sizeable price increases across all housing types surveyed in St. John's.

The price of standard two-storey homes experienced the greatest gain, jumping by 6.0 per cent year-over-year to \$424,167. Detached bungalow prices followed closely behind, rising by 5.9 per cent to \$313,500. Standard condominium prices also realized a significant increase, lifting 5.1 per cent to \$331,500.

“Increased activity levels in the higher end of the market have kept average prices buoyant,” said Glenn Larkin, Salesperson at Royal LePage Professionals 2000 Inc. “Homes priced in the \$500,000 to \$800,000 bracket are in highest demand. Resale homes, in particular, are seeing a surge in popularity, with the market for new construction homes slightly softer.”

“We've also seen a doubling of the number of homes selling at the over one million dollar mark,” added Larkin.

Nationally, the average price of a home in Canada rose between 4.4 per cent and 6.1 per cent year-over-year in the third quarter of 2014. According to Royal LePage, the average price of a standard two-storey home rose 5.5 per cent to \$441,714, while detached bungalows increased 6.1 per cent to \$405,101. Condominiums on average showed slightly lower year-over-year gains, posting a 4.4. per cent increase to \$257,377.

“In the seven years since the Canadian housing market began its recovery from the worldwide recession, home price growth has been robust, often greater than the long-term average of approximately five per cent,” said Phil Soper, president and chief executive of Royal LePage. “We are now experiencing a natural slowing in the rate of year-over-year price appreciation, with real estate markets moderating in most parts of the country, a transition to what our agents refer to as a ‘Goldilocks market,’ one that is neither too hot, nor too cold. To be clear, we

expect home prices to continue to grow in the months ahead, but at a slower rate than we have seen in recent years.”

About the Royal LePage House Price Survey

The Royal LePage House Price Survey is the largest, most comprehensive study of its kind in Canada, with information on seven types of housing in over 250 neighbourhoods from coast to coast. This release references an abbreviated version of the survey which highlights house price trends for the three most common types of housing in Canada in 90 communities across the country. A complete database of past and present surveys is available on the Royal LePage website at www.royallepage.ca. Current figures will be updated following the complete tabulation of the data for the third quarter of 2014. A printable version of the third quarter 2014 survey will be available online on November 12, 2014. Housing values in the Royal LePage House Price Survey are Royal LePage opinions of fair market value in each location, based on local data and market knowledge provided by Royal LePage residential real estate experts.
