

## **ST. JOHN'S HOME PRICES SEE MODERATE APPRECIATION DURING THE FIRST QUARTER**

*Broad selection of available inventory creates mild buyers' market heading into spring*

**ST. JOHN'S, April 15, 2015** – The Royal LePage House Price Survey released today showed average home prices experienced slight increases across all housing types surveyed in St. John's during the first quarter of 2015.

The average price for a standard two-storey home in St. John's increased by 1.8 per cent year-over-year to \$407,667. Standard condominiums rose 1.7 per cent to \$320,833 and detached bungalows gained 1.4 per cent to \$300,100.

“We are experiencing a softening of price appreciation, meaning prices are still increasing but at a slower rate. Consequently, St. John's is a mild buyers' market at the moment,” said Glenn Larkin, agent, Royal LePage Professionals 2000. “Consumer confidence has declined slightly in recent months due to several local business closures and the continuation of depressed oil prices.”

Larkin stated that sales of bungalows and two-storey homes had increased between 1 and 2 per cent year-over-year, while condominium unit sales were essentially flat. Inventory levels were slightly higher than they were at the end of 2014, providing a wide array of choices for buyers in the upcoming spring market.

Nationally, Canada's real estate market is experiencing a soft landing, characterized by slower than normal home price increases. Much higher price increases were observed in the country's two largest urban markets, which combined to send the national average values upwards, partially obscuring the broader national trend.

During the quarter, the average price of a home in Canada rose between 3.8 per cent and 6.6 per cent year-over-year in the first quarter. When broken out by housing type, the survey showed a year-over-year average price increase of 5.3 per cent to \$451,463 for standard two-storey homes, while detached bungalows rose 6.6 per cent to \$405,895. During the same period, the average price of standard condominiums climbed 3.8 per cent to \$261,782.

The steady softening of prices in most markets across the country was first observed in the mid-year 2014 Royal LePage House Price Survey. In recent months, two unanticipated factors disrupted the natural housing price cycle: the steep decline in oil prices late in 2014 and the Bank of Canada's subsequent reaction in lowering the overnight rate early in 2015.

“Canadian home buyers, with the last decade’s recession still top of mind, have been very sensitive to shifting, broad economic factors. The oil shock has been unsettling for the national economy, consumer confidence and by extension, the housing market,” said Phil Soper, president and chief executive, Royal LePage. “That said, lower prices at the pump and the confidence boosting move by the central bank to lower interest rates have been supportive. With these factors combined, we have a soft-landing for housing after several years of robust expansion. We define a soft-landing as a market in which home prices are flat or increasing slightly, giving the economy and family incomes, a chance to catch up.”

“On balance, we believe we will not be seeing the kind of appreciation observed over the last three years any time soon, as markets work through the current cycle and align with broader economic conditions,” continued Soper. “In terms of downside risk, we do not foresee a sharp decline in home prices, particularly in today’s low interest rate environment.”

### **About the Royal LePage House Price Survey**

The Royal LePage House Price Survey is the largest, most comprehensive study of its kind in Canada, with information on seven types of housing in over 250 neighbourhoods from coast to coast. This release references an abbreviated version of the survey which highlights house price trends for the three most common types of housing in Canada in 90 communities across the country. A complete database of past and present surveys is available on the Royal LePage website at [www.royallepage.ca](http://www.royallepage.ca). Current figures will be updated following the complete tabulation of the data for the first quarter of 2015. A printable version of the first quarter 2015 survey will be available online on May 15, 2015. Housing values in the Royal LePage House Price Survey are Royal LePage opinions of fair market value in each location, based on local data and market knowledge provided by Royal LePage residential real estate experts.

### **About Royal LePage**

Serving Canadians since 1913, Royal LePage is the country’s leading provider of services to real estate brokerages, with a network of over 16,000 real estate professionals in more than 600 locations nationwide. Royal LePage is the only Canadian real estate company to have its own charitable foundation, the Royal LePage Shelter Foundation, dedicated to supporting women’s and children’s shelters and educational programs aimed at ending domestic violence. Royal LePage is a Brookfield Real Estate Services Inc. company, a TSX-listed corporation trading under the symbol TSX:BRE.
