

Regina Home Prices See Softness in the Fourth Quarter of 2015

Buyers benefitting from high inventory in all housing categories

REGINA, January 13, 2016 – The aggregate¹ price of a home in Regina showed a modest decline of 1.4 per cent year-over-year to \$321,139 in the fourth quarter of 2015, according to the Royal LePage House Price Survey² and Market Survey Forecast³ released today.

When broken down by housing type, the price of a two-storey home remained flat year-over-year with relatively little change in the median price of \$416,824. The price of bungalows remained steady with a very slight dip of 0.7 per cent to \$297,660. Condominiums declined 12.5 per cent year-over-year to a median price of \$238,789.

“High inventory levels in all categories of Regina’s housing market have put downward pressure on prices in the region,” said Mike Duggleby, broker and managing partner, Royal LePage Regina Realty. “While the detached home segment has remained relatively flat year-over-year, condominiums are seeing sizable price declines resulting from a high degree of new development construction over the past several years.”

Looking ahead, Duggleby maintains a cautious outlook about Regina’s housing market. “As a resource-based economy, Saskatchewan is dependent on prices improving for oil. If resource prices pick up, we will see an increase in unit sales and prices of homes.”

Nationally, Canada’s residential real estate market showed strong growth in the fourth quarter of 2015, led by hot Vancouver and Toronto markets. Looking forward to 2016, Royal LePage expects continued price increases in most markets, but not at the pace that has been the recent norm. Instead, the national real estate market is expected to slow later this year, principally due to the effects of a dampened economy in Western Canada and eroding affordability in Toronto and Vancouver.

The price of a home in Canada increased 6.5 per cent year-over-year to \$500,688 in the fourth quarter. The price of a two-storey home rose 7.7 per cent year-over-year to \$610,134, and the price of a bungalow increased 5.4 per cent to \$420,082. During the same period, the price of a condominium increased 3.1 per cent to \$341,448. Looking ahead to 2016, Royal LePage forecasts that the median price of a home in Canada will increase at 4.1 per cent for the full year when compared to 2015.

“The frenetic pace of our country’s largest housing markets should moderate throughout the year ahead,” said Phil Soper, president and chief executive officer, Royal LePage. “While most of the country will continue to see house value appreciation in 2016, we expect that the pace of price

increases in the Greater Vancouver and the Greater Toronto Areas – where real estate appreciation has significantly outpaced job and wage growth – will settle to a more sustainable, single-digit price increase trajectory.”

In 2016, Royal LePage expects the price of residential real estate in Canada to be more heavily influenced by macroeconomic factors than by housing-specific variables such as tighter regulation in the mortgage industry. The Bank of Canada is expected to keep its overnight rate steady through the all-important spring market, extending the prolonged period of exceptionally low borrowing rates. While the new Federal Minister of Finance kicked off his appointment with a hike to 10% in the minimum down payment required for the portion of mortgage insurance over \$500,000, Royal LePage expects this change to have a marginal effect on the overall market.

About the Royal LePage House Price Survey

The Royal LePage House Price Survey provides information on the three most common types of housing in Canada, in 53 of the nation’s largest real estate markets. Housing values in the House Price Survey are based on the Royal LePage National House Price Composite, produced quarterly through the use of company data in addition to data and analytics from its sister company, Brookfield RPS, the trusted source for residential real estate intelligence and analytics in Canada. Commentary on housing and forecast values are provided by Royal LePage residential real estate experts, based on their opinions and market knowledge.

About Royal LePage

Serving Canadians since 1913, Royal LePage is the country’s leading provider of services to real estate brokerages, with a network of over 16,000 real estate professionals in more than 600 locations nationwide. Royal LePage is the only Canadian real estate company to have its own charitable foundation, the Royal LePage Shelter Foundation, dedicated to supporting women’s and children’s shelters and educational programs aimed at ending domestic violence. Royal LePage is a Brookfield Real Estate Services Inc. company, a TSX-listed corporation trading under the symbol TSX:BRE.
