

Regina Home Prices Remain Relatively Flat in the Second Quarter of 2016

First-time buyers find prices and selection attractive

REGINA, July 13, 2016 – The Royal LePage House Price Survey¹ and Market Survey Forecast released today revealed a modest decline in prices across housing types surveyed in Regina. During the second quarter of 2016, the aggregate² house price in the region slipped 1.7 per cent year-over-year to \$323,612.

When broken out by housing type, the median price of a two-storey home dipped 1.7 per cent to \$385,225. During the same period the price of a bungalow remained relatively unchanged, decreasing 0.1 per cent year-over-year to \$298,004 and the median price of a condominium saw a significant dip, slipping 12.1 per cent to \$249,345.

“High inventory levels in the condominium segment helped to create an opportunity for buyers in Regina, putting downwards pressure on prices,” said Mike Duggleby, broker and managing partner, Royal LePage Regina Realty. “With continued low interest rates, we are seeing that buyers feel less pressure to buy, but more millennials are entering the market to take advantage of the prices and selection available.”

Although Saskatchewan is facing the challenges of low oil and potash prices, Duggleby anticipates this will be a very good year for agriculture in the region noting that “a good crop means a big cash injection for the Regina economy.”

Looking ahead to the remainder of 2016, Royal LePage forecasts that the aggregate price of a home in the city will increase 2.0 per cent for the full year.

Nationally, Canada’s residential real estate market continued to show strong appreciation in the second quarter of 2016, posting the highest national year-over-year gain seen in five years. Amid continued world economic uncertainty, the historically low interest rate environment that has fueled Canada’s real estate market growth in recent years – most notably in Greater Vancouver and the Greater Toronto Area (GTA) – is expected to continue longer than anticipated. This extended period of low-cost borrowing will in turn further delay the cyclical cooling of Canada’s hottest real estate markets, originally forecasted for the second half of 2016.

The price of a home in Canada increased 9.2 per cent year-over-year to \$520,223 in the second quarter of 2016. During the same period, the price of a two-storey home rose 10.7 per cent year-over-year to \$619,671, the price of a bungalow increased 7.9 per cent to \$437,121, and the price of a condominium increased 4.2 per cent to \$348,189. Looking ahead to the remainder of 2016, Royal LePage forecasts that the aggregate price of a home in Canada will increase 12.4 per cent when compared to year end 2015.

² Aggregate prices are calculated via a weighted average of the median values of homes for reported property types in the regions surveyed

“Our forecasting models, which pointed to a slowing housing market as the year progressed, included a modest increase in the cost of borrowing,” said Phil Soper, president and chief executive officer, Royal LePage. “Economic and social disruptions have rocked the world once again, introducing new risks and making it very likely that the Bank of Canada will leave interest rates as-is for now. Few industries are as rate sensitive as real estate. We don’t see even a mild correction for either the Toronto or pistol-hot Vancouver markets in 2016.”

“Our call for 12.4 per cent national price appreciation in the final quarter of this calendar year as compared to the final quarter of last year, is a landmark in Canada. I believe it is the highest value put forward by any serious forecasting agency since the turn of the century,” added Soper.

About the Royal LePage House Price Survey

The Royal LePage House Price Survey provides information on the three most common types of housing in Canada, in 53 of the nation’s largest real estate markets. Housing values in the House Price Survey are based on the Royal LePage National House Price Composite, produced quarterly through the use of company data in addition to data and analytics from its sister company, Brookfield RPS, the trusted source for residential real estate intelligence and analytics in Canada. Commentary on housing and forecast values are provided by Royal LePage residential real estate experts, based on their opinions and market knowledge.

About Royal LePage
