

St. John's Home Prices Remain Relatively Flat in the Final Quarter of 2016

Oversupply of inventory and low oil prices contributing to a challenging housing market

ST. JOHN'S, January 12, 2017 – The Royal LePage House Price Survey¹ and Market Survey Forecast released today, revealed that aggregate² home prices in St. John's slipped 1.5 per cent year-over-year in the final quarter of 2016, to \$334,782.

When broken out by housing type, the median price of a two-storey home remained flat, with a slight increase of 0.3 per cent year-over-year to \$380,099. During the same period, condominium prices saw a modest decline of 1.4 per cent to \$286,521, while bungalow prices fell 3.2 per cent to \$306,279.

“It's been a tough year. Consumer confidence is at an all-time low,” said Glenn Larkin, sales representative, Royal LePage Professionals 2000. “Layoffs, low oil prices and higher taxes have all contributed to a sense of unease in the housing market. The lack of jobs and affordable inventory is forcing would-be homebuyers in our region to move to Ontario for employment opportunities.”

Larkin forecasts home prices will drop further in 2017 as a result of continued layoffs in oil refineries and major projects coming to an end.

Nationally, Canada's residential real estate market saw significant year-over-year price appreciation in the fourth quarter of 2016, supported by considerable gains in the Greater Toronto Area (GTA) and Greater Vancouver. Looking ahead, Royal LePage expects the regional extremes in house price appreciation that characterized the national real estate market in 2016 to narrow in 2017. This trend is anticipated to be driven primarily by a price correction in the Greater Vancouver housing market, strong but moderating price appreciation in the GTA, and welcomed upward price trends in Quebec, Atlantic Canada and Alberta.

The price of a home in Canada increased 13.0 per cent year-over-year to \$558,153 in the fourth quarter of 2016 – the highest year-over-year national home price increase recorded in over a decade. The price of a two-storey home rose 14.3 per cent year-over-year to \$661,730, and the price of a bungalow increased 12.5 per cent to \$481,460. During the same period, the price of a condominium increased 7.4 per cent to \$356,307. Looking to the year ahead, Royal LePage forecasts that the aggregate price of a home will increase 2.8 per cent in 2017 when compared to year-end, 2016.

“The disparity in home price appreciation between Canadian regions has never been greater than that seen in 2016, with rates ranging from double-digit extremes in some cities to negative growth in others,” said Phil Soper, President and CEO, Royal LePage. “This economic drama put real estate at the forefront of everybody's mind last year, from the Prime Minister to the recent

grad. In 2017, we anticipate a movement away from the regional extremes of real estate feast and famine – and that is a very good thing.”

For the Canadian real estate market, 2016 was marked by a slew of new public policy initiatives at national, provincial and municipal levels. “While efforts to address deteriorating affordability in Ontario and B.C.’s largest metropolitan areas are well-intentioned, too many new taxes and regulations, by too many levels of government, introduced within such a short timeline and with perceivably little research and consultation, have caused confusion and triggered drops in consumer confidence, risking the long-term health of Canada’s housing market,” said Soper.

“Price appreciation disparities between regions have created a quandary for policymakers who have tried to tame overheated housing markets, while supporting slower ones. What our leaders have been slow to address, and what is at the heart of the matter, is the supply side of the equation in the country’s hottest markets. Housing shortages have put immense upward pressure on prices,” he concluded.

About the Royal LePage House Price Survey

The Royal LePage House Price Survey provides information on the three most common types of housing in Canada, in 53 of the nation’s largest real estate markets. Housing values in the House Price Survey are based on the Royal LePage National House Price Composite, produced quarterly through the use of company data in addition to data and analytics from its sister company, Brookfield RPS, the trusted source for residential real estate intelligence and analytics in Canada. Commentary on housing and forecast values are provided by Royal LePage residential real estate experts, based on their opinions and market knowledge.

About Royal LePage
