

## Regina Home Prices See Moderate Decline in Fourth Quarter of 2017

*Encouraging news on potash expected to boost housing market in 2018*

**REGINA, January 10, 2018** – The aggregate price of a home in Regina continued to decline in the fourth quarter of 2017, dipping 1.7 per cent year-over-year to \$329,366, according to the Royal LePage House Price Survey<sup>1</sup> released today.

When broken out by housing type, the median price of a two-storey home saw a moderate decrease of 2.7 per cent year-over-year to \$400,006, while the median price of a bungalow dipped 0.2 per cent year-over-year to \$299,178. During the same period, the median price of a condominium decreased 5.7 per cent year-over-year to \$231,692.

“Regina is primarily a resource-based economy dependent on the condition of oil and potash, which are both in a bit of a depressed state,” said Mike Duggleby, broker and managing partner, Royal LePage Regina Realty. “While oil prices are down, we have had some encouraging news on potash, as the two market leaders have merged to create a powerhouse. We don’t expect to see much change in the first six months of 2018, but this should improve activity in the housing market in the latter half of the year.”

Duggleby further explained that the double-digit decline in condominium prices are a byproduct of governmental policies implemented years ago.

“A few years back, Regina had a vacancy rate under one per cent, prompting the government to offer incentives for purpose-built rental stock,” said Duggleby. “Now, construction activity is through the roof in the city and we’re paying the price for the incentive. It will take at least another year to absorb the inventory and see notable price appreciation.”

Nationally, Canada’s residential real estate market saw strong, but slowing year-over-year price growth in the fourth quarter of 2017. The Royal LePage National House Price Composite, compiled from proprietary property data in 53 of the nation’s largest real estate markets, showed that the price of a home in Canada increased 10.8 per cent year-over-year to \$626,042 over the three-month period. When broken out by housing type, the median price of a two-storey home rose 11.1 per cent year-over-year to \$741,924, and the median price of a bungalow climbed 7.1 per cent to \$522,963. During the same period, the median price of a condominium appreciated faster than any other housing type studied, rising 14.3 per cent to \$420,823 on a year-over-year basis.

“To prospective homeowners in our largest cities, condominiums represent the last bastion of affordability,” said Phil Soper, president and CEO, Royal LePage. “This is especially true for first-time buyers whose purchasing power has been reduced by tightening mortgage regulations.”

In line with Royal LePage’s previous [Market Survey Forecast](#), Royal LePage predicts that the price of a home in Canada will increase 4.9 per cent by the end of 2018. Looking ahead, the

company anticipates that the new OSFI stress test will slow the housing market in the first half of 2018, as buyers adjust their expectations and many market participants take a “wait and see” approach.

“The unsustainably high rates of home price appreciation witnessed in recent years in B.C. and Ontario were dangerous to the stability of not only the housing market, but to the broader economy itself,” continued Soper. “Policy measures like the OSFI stress test will quell runaway housing inflation to an extent. However, we do foresee an upswing in demand in the latter portion of the year, as prospective buyers adjust to the new realities. To put it another way, the demand is still there.”

### **About the Royal LePage House Price Survey**

The Royal LePage House Price Survey provides information on the three most common types of housing in Canada, in 53 of the nation’s largest real estate markets. Housing values in the House Price Survey are based on the Royal LePage National House Price Composite, produced quarterly through the use of company data in addition to data and analytics from its sister company, RPS Real Property Solutions, the trusted source for residential real estate intelligence and analytics in Canada. Commentary on housing and forecast values are provided by Royal LePage residential real estate experts, based on their opinions and market knowledge.

### **About Royal LePage**

Serving Canadians since 1913, Royal LePage is the country’s leading provider of services to real estate brokerages, with a network of close to 18,000 real estate professionals in more than 600 locations nationwide. Royal LePage is the only Canadian real estate company to have its own charitable foundation, the Royal LePage Shelter Foundation, dedicated to supporting women’s and children’s shelters and educational programs aimed at ending domestic violence. Royal LePage is a Brookfield Real Estate Services Inc. company, a TSX-listed corporation trading under the symbol TSX:BRE.
