

Ottawa Home Prices See Healthy Growth in the First Quarter of 2018

Continued demand and shortage of listings intensifies pressure on Ottawa home prices

OTTAWA, April 13, 2018 – The aggregate price of a home in Ottawa saw a healthy increase in the first quarter of 2018, rising 4.7 per cent year-over-year to \$437,243, according to the Royal LePage House Price Survey¹ released today.

When broken out by housing type, the median price of a two-storey home continued to lead all housing types surveyed within the region, increasing 5.8 per cent year-over-year to \$464,019 in the first quarter of 2018, while the median price of a bungalow rose 4.0 per cent year-over-year to \$425,869. During the same period, the median price of a condominium decreased 1.8 per cent year-over-year to \$319,295.

“Inventory levels in the region have continued to drop over the last six months,” said John Rogan, broker of record, Royal LePage Performance Realty. “There are not a lot of new homes being built in the region and as a result, the properties that do go up for sale are receiving multiple offers. Older condominium units are also becoming increasingly attractive for first-time homebuyers, as their prices have remained relatively steady.

“Despite the shortage of homes for purchase, Ottawa remains an attractive city for many first-time homebuyers and families migrating from other urban centers,” continued Rogan.

Nationally, Canada’s residential real estate market saw slowing year-over-year increases in the first three months of 2018. On a quarter-over-quarter basis for the same period, home prices in many markets across the country remained relatively flat, with approximately half of the markets studied by Royal LePage posting slight declines.

“We are experiencing a broad-based, residential housing correction in Canada, triggered by federal and provincial intervention,” said Phil Soper, president and CEO, Royal LePage. “Strong house price gains in the first half of 2017 mask some of the recent market shifts when comparing year-over-year home value trends.”

“The combination of declining affordability and government intervention has for the most part neutralized very high home price appreciation levels in the greater Vancouver and Toronto regions, relative to the extreme heights witnessed in recent periods,” continued Soper. “However, the demand for housing is so strong that the rate of home price appreciation is expected to pick up again in the second half of 2018.”

The Royal LePage National House Price Composite, compiled from proprietary property data in 63 of the nation’s largest real estate markets, showed that the price of a home in Canada increased 6.2 per cent year-over-year to \$605,512 in the first quarter of 2018. When broken out by housing type, the median price of a two-storey home rose 5.7 per cent year-over-year to

\$715,726, and the median price of a bungalow climbed 4.5 per cent to \$501,985. Condominiums continued to witness the highest price appreciation rates among housing types studied, rising 10.3 per cent to \$418,245.

“While we have recently seen both overshooting and corrections in Canada’s largest markets, on a national basis we believe the Canadian housing market is amidst a long-term expansionary cycle supported by strong economic fundamentals,” said Soper. “Canada’s stature is rising on a global scale. Our cities continue to be ranked among the most desired places to live in the world. Our economy is strong, our unemployment levels are the lowest they’ve been in four decades and we have one of the fastest-growing populations among advanced economies. These factors combined are incredibly supportive of long-term housing demand and valuations.”

About the Royal LePage House Price Survey

The Royal LePage House Price Survey provides information on the three most common types of housing in Canada, in 63 of the nation’s largest real estate markets. Housing values in the House Price Survey are based on the Royal LePage National House Price Composite, produced quarterly through the use of company data in addition to data and analytics from its sister company, RPS Real Property Solutions, the trusted source for residential real estate intelligence and analytics in Canada. Commentary on housing and forecast values are provided by Royal LePage residential real estate experts, based on their opinions and market knowledge.
