

House Prices in London Show Sizeable Increase

Seller's market fueled by strong economy and good value

LONDON, July 10, 2019 – The aggregate price of a home in London rose 9.5 per cent year-over-year to \$406,000 in the second quarter of 2019, according to the Royal LePage House Price Survey¹ released today.

The median price of a two-storey home and a bungalow also saw significant increases, rising 8.6 per cent year-over-year to \$440,466 and 11.0 per cent year-over-year to \$362,695, respectively.

“London has a lot to offer buyers. Our real estate market has good value and our economy is strong,” said Peter Meyer, owner and broker of record, Royal LePage Triland Realty. “The tech and research industries are growing and announcing new jobs in our region.

“Not every area of the city is seeing the same activity; we are on the cusp of seeing things begin to soften. Overall, the price increases will slow, but remain healthy,” added Meyer.

The Royal LePage National House Price Composite, compiled from proprietary property data in 63 of the nation's largest real estate markets, showed that the price of a home in Canada increased 1.1 per cent year-over-year to \$621,696 in the second quarter of 2019. When broken out by housing type, the median price of a two-storey home rose 1.0 per cent year-over-year to \$727,165, while the median price of a bungalow dipped 0.4 per cent year-over-year to \$516,048. Condominiums remained the fastest growing housing type on a national basis, with its median price rising 3.8 per cent year-over-year to \$452,451.

“We now have evidence of a sustained market recovery in the nation's largest market, and signs of a price floor in other regions hit hard by the eighteen month-old housing correction,” said Phil Soper, president and CEO, Royal LePage. “Only in the West do we see a significant number of home buyers remaining on the sidelines, depressing sales volumes and causing prices to sag. Buoyed by supportive economic conditions, many stubborn homeowners in B.C. and Alberta remain unwilling to let their precious real estate go for less than what they perceive as fair value, which has gone a long way to protecting existing home values.”

Royal LePage expects national home prices to see a modest uptick by the end of the year, rising 0.4 per cent compared to the end of 2018.

¹ Aggregate prices are calculated using a weighted average of the median values of all housing types collected. Data is provided by RPS Real Property Solutions.

About the Royal LePage House Price Survey

The Royal LePage House Price Survey provides information on the three most common types of housing in Canada, in 63 of the nation's largest real estate markets. Housing values in the Royal LePage House Price Survey are based on the Royal LePage Canadian Real Estate Market Composite, produced quarterly through the use of company data in addition to data and analytics from its sister company, RPS Real Property Solutions, the trusted source for residential real estate intelligence and analytics in Canada. Commentary on housing and forecast values are provided by Royal LePage residential real estate experts, based on their opinions and market knowledge.
